I'm a high-energy seasoned entrepreneur with a passion for leveraging software to solve real world problems. My previous experience in finance, emerging markets, and user-facing applications allow me to approach new challenges from a multidisciplinary mindset. I'm skilled in fullstack [Typescript](#), [React](#), [Python](#), & [AI](#), and love learning new languages.

I'm currently seeking to use my technical & product experience to join a great team, learn a lot, and drive impact at Microsoft.

PROJECTS

Studyflow ([github](#)) ~ Team Lead

Feb 2024 - July 2024

Created a full stack web application to help people organize their self studying through a kanban style dashboard & create AI studytracks for whatever topic they are interested in..

- Lead a team of 4 across github tickets to complete a full stack application from scratch through hundreds of code commits.
- Created an AI workflow to break down complex topics into smaller parts & provide links to external resources.

Coinsignals.trade ([link](#)) ~ Founder (Successful Exit)

Nov 2019 - March 2021

Created a web application that allows people the ability to chart any cryptocurrency coin listed on coinmarketcap.com

- Launched and promoted the app to my network, at the time it became the primary solution for charting cryptocurrency assets with smaller market capitalizations.
- Website grew to over 35,000 weekly sessions users and was eventually acquired by CoinTrader.

EDUCATION

Columbia Justice In Education Scholars Program

New York, NY

Columbia University

Sept 2024 - Dec 2024

One of six Fellows selected from hundreds of applicants to take free undergraduate classes at Columbia University as a supported pathway into fully matriculating at the university.

Justice Through Code at Columbia University

Remote

Columbia University

Feb 2024 - July 2024

JTC is a rigorous eight-month long full-stack software engineering intensive.

- Built weekly mini-projects in Javascript and Python covering an assortment of topics from frontend libraries, algorithms & data structures, containers, networking, cloud architecture, and ML technologies.
- Learned system design, cloud architecture, & networking principles from senior developers at numerous top tech firms.
- Coordinated a 4 month group capstone project as scrum owner and lead developer to complete a full stack AI-based web app.

New York University

New York, NY

BA. Philosophy (incomplete)

Aug 2014 - Aug 2017

Leslie eLab Entrepreneurship Fellow: Fellow at an exclusive NYU Entrepreneurship lab that put on weekly classes from successful startup founders and provided access to experienced mentors and resources

PROFESSIONAL EXPERIENCE

Web Developer

Remote, US

Freelancer

Aug 2023 – Present

- Translated PSD & Figma design files into fully interactive promotional websites with PHP, Javascript, HTML, & CSS
- Optimized code reusability, user experience, page speed, and ADA compliance for a network of 30 websites.

Crypto Asset Management Fund

New York, NY

Principal Investor

2018 – 2020

- Launched a fund that traded blockchain assets primarily bitcoin for several high-net-worth individuals.
- Grew the fund to trade over 1000 BTC as the sole trader & fund manager.

App Partner

New York, NY

Lead Digital Marketing Associate

2015 – 2017

- Worked directly with the CEO as the first digital marketing hire to increase web presence and generate warm leads through an inbound marketing funnel. Over my time at the company I increased web presence up 400%+ which ended up driving hundreds of thousands of dollars in contracts.
- Assisted growing the marketing team from just me to 4 other members.
